

1. On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

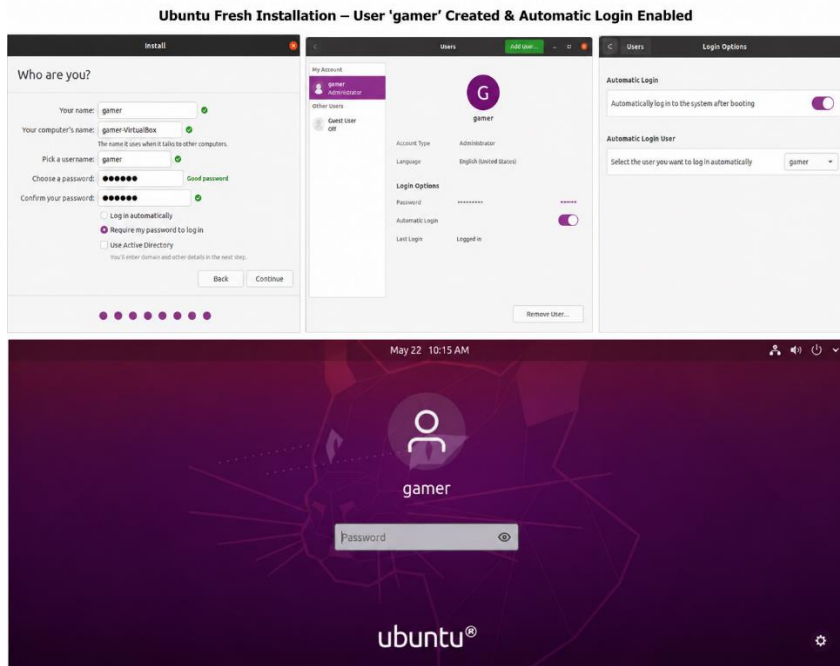

2. Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation. Hint: If you don't have a spare USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.

Task	Status
Linux ISO Downloaded	Successful
Rufus Installed	Successful
USB Drive Detected	Successful
Bootable USB Created	Successful
OR VirtualBox Installed	Successful
ISO Booted Successfully	Successful

3. On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati. Hint: Find 'Language & Region' in System Preferences to add or change language.

4. Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

5. Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing

Step-by-Step Guide: Installing Windows 10 on a Laptop

Prerequisites

- Windows 10 ISO file
- Bootable USB drive (8 GB or larger)
- Product key (if available)
- Backup of important files

Step 1: Create a Bootable USB

1. Download the Windows 10 ISO from Microsoft's website.
 2. Use Rufus or the Media Creation Tool.
 3. Select the USB drive and create the bootable media.
-

Step 2: Boot from the USB Drive

1. Insert the USB drive into the laptop.
 2. Restart the laptop.
 3. Press the boot menu key (F12, Esc, F9, or F11 depending on the manufacturer).
 4. Select the USB drive.
-

Step 3: Start Windows Setup

1. Choose:
 - Language
 - Time and Currency Format
 - Keyboard Layout
 2. Click **Next**.
 3. Click **Install Now**.
-

Step 4: Enter Product Key

- Enter the Windows product key.
 - If you don't have one, click **I don't have a product key**.
-

Step 5: Select Windows Edition

- Choose the appropriate edition:
 - Windows 10 Home
 - Windows 10 Pro

Click **Next**.

Step 6: Accept License Terms

- Check **I accept the license terms**.
 - Click **Next**.
-

Step 7: Choose Installation Type

Select:

Custom: Install Windows only (Advanced)

Step 8: Partitioning the Drive

For a New/Empty Drive

1. Select **Unallocated Space**.
2. Click **New**.
3. Create a partition for Windows (100–150 GB recommended).
4. Windows automatically creates required system partitions.

For an Existing Drive

1. Backup data first.
2. Delete old Windows partitions if performing a clean install.
3. Select the target partition.
4. Click **Format** if necessary.

Partitioning Tips

Partition	Recommended Size
C: (Windows)	100–150 GB
D: (Data/Games)	Remaining Space
EFI/System Reserved Created Automatically	

Step 9: Install Windows

1. Select the Windows partition.
 2. Click **Next**.
 3. Wait while Windows copies files and reboots several times.
-

Step 10: Complete Initial Setup

1. Select your region.
2. Choose keyboard layout.
3. Connect to Wi-Fi.
4. Create a user account.
5. Set a password.

Step 11: Privacy Settings

Recommended settings:

Setting	Recommendation
Location Tracking	Off
Diagnostic Data	Basic/Required Only
Tailored Experiences	Off
Advertising ID	Off
Find My Device	Optional
Speech Recognition	Optional

Step 12: Install Drivers

1. Open **Device Manager**.
 2. Check for unknown devices.
 3. Install:
 - Graphics Driver
 - Audio Driver
 - Network Driver
 - Chipset Driver
-

Step 13: Run Windows Update

1. Open **Settings** → **Update & Security**.
 2. Click **Check for Updates**.
 3. Install all available updates.
 4. Restart when prompted.
-

Step 14: Install Essential Software

- Web Browser
- Office Applications
- Antivirus (if desired)
- PDF Reader
- Media Player
